Full stack web developer with over three years experience as a digital project manager. Took the initiative to learn programming in order to improve workflow and understanding of development requests. During the process of continuing education, fell in love with the problem-solving and creative aspect of web development and decided to transition to a back end role. Recently obtained a certificate in full stack development from the University of Columbia. As a team-member, flexible and able to switch between roles where help is needed in order to deliver a polished product on schedule.

TECHNICAL SKILLS

JavaScript; jQuery; CSS and CSS frameworks such as Bootstrap, Semantic-UI, Bulma; GitHub; APIs; JSON; CLIs; Agile methodologies/process; project management; ability to prioritize and quickly adapt to change.

APPLICATIONS BUILT

TableToast | GitHub: https://github.com/mackenzieraeclark/Project1 **| Deployed:** https://mackenzieraeclark.github.io/Project1/
- A recipe search app that puts a food and drink database at your fingertips in order to facilitate party menu planning
- Worked on Front End and Back End tasks as part of a team of seven, instrumental in refining code to get the app polished and functioning on schedule
- Built Front End display structure for the Food, Drink, User Storage and Random Drink features
- Leveraged skills in HTML, Semantic-UI CSS framework, JavaScript/jQuery, Local Storage, APIs

WeatherDash | GitHub:https://github.com/keycole/weather-dashboard **| Deployed:** https://keycole.github.io/weather-dashboard/
- A weather dashboard that runs in the browser and features dynamically updated HTML and CSS displaying the weather outlook for requested cities. Previous searches are stored in local memory for easy access when a user returns to the page
- Leveraged skills in dynamic HTML generation, Bootstrap CSS framework, APIs, Moment.js, Local Storage, JavaScript/jQuery

DayPlanner | GitHub: https://github.com/keycole/work-day-scheduler **| Deployed:** https://keycole.github.io/work-day-scheduler/
- A simple calendar application that allows the user to save events for each hour of the day. Items are color coded to indicate past, future, and present events
- Leveraged skills in dynamic HTML generation, Bootstrap CSS framework, Moment.js, Local Storage, JavaScript/jQuery.

EXPERIENCE

American Media, LLC - New York, NY 10004   **2012 - Present**
Digital Project Manager
- Manages a development team of seven, assigning daily tasks and managing progress using Jira
- Instrumental in creating and maintaining documentation using Confluence
- Participated in the successful migration and redesign of over nine brands including: Men's Journal (www.mensjournal.com/) and Us Weekly (www.usmagazine.com/).
